## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not clear how the device brews a beverage at a first and second brewing pressure. There is recited no structure to perform the claimed function.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-4 are rejected under 35 U.S.C. 102(a) as being anticipated by Schmed.

There is disclosed in Schmed a coffee machine for preparing a coffee beverage at different brewing pressures, comprising: a brewing means 5, 6; an outlet line; a tap opening 7; a throttle means 12 provided in the outlet line, the throttle being adjustable between a first and a second flow cross-section (figs. 2, 3) and being adjustable by the action of the brewing pressure; wherein the throttle means comprises: a piston 21 with a piston surface 23; a motion means (spring) 29 for moving the piston.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application

Art Unit: 1761

by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1, 2 and 7 are rejected under 35 U.S.C. 102(e) as being anticipated by De Koning et al.

There is disclosed in De Koning a coffee machine for preparing a coffee beverage at different brewing pressures, comprising: a brewing means 2; an outlet line 26; a tap opening (end of outlet line); a throttle means 20 provided in the outlet line, the throttle being adjustable between a first and a second flow cross-section 22, 24 and being adjustable by the action of the brewing pressure.

#### ***Allowable Subject Matter***

Claims 5, 6 and 8-10 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

#### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patent to Lassota is cited for its disclosure of an cross-section adjustable valve member.
